

High School Fishing League Star Lake Event Results

2018 ,Event Held on July 12th

Please note the information regarding the HS Fishing League event held on Star Lake on the evening of July 12th, 2018 as follows:

- (1) The League is setup to be a multi-species league (ie: walleye, northern, bass, sunfish, and crappie are all promoted as species to catch)
- (2) Each team is allowed to score (5) total fish per event and each fish is measured and RELEASED
- (3) Fish lengths are converted to a 1-5 point system based on length by species caught. For example, a (9) inch bluegill will score the same point value in the team score as an 18-21 inch walleye.
Walleye scoring.....13-15 = 1, 15-18 = 2, 18-21 = 3, 21-24 = 4, 24-27 = 5 Over 27 = +1
Each fish species has its own length scale with the same point values assigned.
- (4) Teams can earn (2) bonus points, if they catch and release a fish from each species category
- (5) This was considered the “northern” tournament. The “southern” tournament was conducted on Pomme de Terre Lake the same evening.
